

Avalanche danger

Forecast through: 19.4.2024, 17:00 / Next update: 19.4.2024, 08:00

New snow, Wind slab

Avalanche prone locations Danger description

The new snow and wind slabs of the last few days are in some cases prone to triggering. As a consequence of a strong wind from westerly directions, further wind slabs will form in the course of the day. Single winter sport participants can release avalanches. Mostly these are medium-sized. Backcountry touring calls for experience in the assessment of avalanche danger.

Danger levels

1 low

2 moderate

3 considerable

4 high

5 very high
