

# Considerable avalanche danger will be encountered over a wide area. Fresh snow and snow drifts require caution

Edition: 13.11.2017, 17:00 / Next update: 14.11.2017, 17:00

## Avalanche danger

region B

Level 3, considerable

### Fresh snow and snow drifts

#### Avalanche prone locations

#### Danger description

The fresh snow and snow drift accumulations are in some cases still prone to triggering. Avalanches can in some places be released by a single winter sport participant. Avalanches can reach medium size in isolated cases. The avalanche prone locations are to be found in particular on wind-loaded slopes and in gullies and bowls. Off-piste activities call for experience in the assessment of avalanche danger and careful route selection.
