

Considerable avalanche danger will be encountered over a wide area

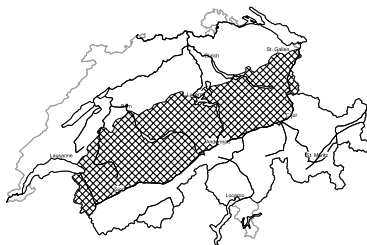

Edition: 14.11.2017, 17:00 / Next update: 15.11.2017, 17:00

Avalanche danger

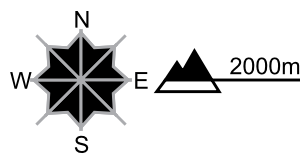

region A

Level 3, considerable

Fresh snow and snow drifts, old snow

Avalanche prone locations

Danger description

The fresh snow and snow drift accumulations of the last few days are in some cases prone to triggering. Avalanches can in some places be released by a single winter sport participant. Avalanches can in isolated cases penetrate near-ground layers of the snowpack and reach medium size, in particular on north facing slopes. Ski touring calls for experience in the assessment of avalanche danger.
