

# Considerable avalanche danger will be encountered over a wide area

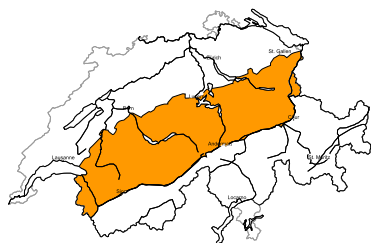

Edition: 14.11.2017, 17:00 / Next update: 15.11.2017, 17:00

## Avalanche danger

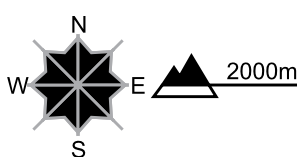

**region A**

**Level 3, considerable**

### Fresh snow and snow drifts, old snow

#### Avalanche prone locations

#### Danger description

The fresh snow and snow drift accumulations of the last few days are in some cases prone to triggering. Avalanches can in some places be released by a single winter sport participant. Avalanches can in isolated cases penetrate near-ground layers of the snowpack and reach medium size, in particular on north facing slopes. Ski touring calls for experience in the assessment of avalanche danger.

**Danger levels**

1 low

2 moderate

3 consider.

4 high

5 very high
