

Considerable avalanche danger will be encountered over a wide area

Edition: 14.11.2017, 17:00 / Next update: 15.11.2017, 17:00

Avalanche danger

region B

Level 3, considerable

Snow drifts

Avalanche prone locations

Danger description

The snow drift accumulations are in some cases prone to triggering. Avalanches can in some places be released by a single winter sport participant. The avalanche prone locations are to be found in particular in gullies and bowls, and behind abrupt changes in the terrain. Off-piste activities call for experience in the assessment of avalanche danger and careful route selection.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
