

Considerable avalanche danger will be encountered over a wide area

Edition: 15.11.2017, 17:00 / Next update: 16.11.2017, 17:00

Avalanche danger

region B

Level 3, considerable

Snow drifts

Avalanche prone locations

Danger description

The snow drift accumulations of the last few days are in some cases still prone to triggering. Avalanches can in some places be released by a single winter sport participant. The avalanche prone locations are to be found in particular in gullies and bowls, and behind abrupt changes in the terrain. Backcountry touring and other off-piste activities call for experience in the assessment of avalanche danger.
