

# Considerable avalanche danger will be encountered over a wide area

Edition: 15.11.2017, 17:00 / Next update: 16.11.2017, 17:00

## Avalanche danger

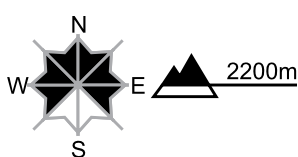

region B

Level 3, considerable

### Snow drifts

#### Avalanche prone locations

#### Danger description

The snow drift accumulations of the last few days are in some cases still prone to triggering. Avalanches can in some places be released by a single winter sport participant. The avalanche prone locations are to be found in particular in gullies and bowls, and behind abrupt changes in the terrain. Backcountry touring and other off-piste activities call for experience in the assessment of avalanche danger.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
