

Considerable avalanche danger will be encountered in some regions. Fresh snow drifts are to be avoided

Edition: 19.11.2017, 17:00 / Next update: 20.11.2017, 17:00

Avalanche danger

region D

Level 1, low

From a snow sport perspective, in most cases insufficient snow is lying. Individual avalanche prone locations are to be found in particular in extremely steep terrain. Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.
