

Moderate avalanche danger will be encountered over a wide area

Edition: 23.11.2017, 17:00 / Next update: 24.11.2017, 17:00

Avalanche danger

region D

Level 1, low

Old snow

From a snow sport perspective, in most cases insufficient snow is lying. Individual avalanche prone locations are to be found in particular in extremely steep terrain. Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.

Remarks

The Avalanche Warning Service currently has only a small amount of information that has been collected in the field, so that the avalanche danger should be investigated especially thoroughly in the relevant locality.
