

As a consequence of fresh snow and wind a considerable avalanche danger will be encountered over a wide area

Edition: 8.12.2017, 17:00 / Next update: 9.12.2017, 17:00

Avalanche danger

region D

Level 2, moderate

Snow drifts

Avalanche prone locations

Danger description

The storm force wind will transport the fresh snow significantly. Fresh snow drift accumulations are to be found in gullies and bowls, and behind abrupt changes in the terrain. In many cases avalanches are only small but can be released in some cases even by a single winter sport participant. The fresh snow drift accumulations are to be avoided whenever possible.
