

As a consequence of fresh snow and wind a considerable avalanche danger will be encountered over a wide area

Edition: 8.12.2017, 17:00 / Next update: 9.12.2017, 17:00

Avalanche danger

region B

Level 3, considerable

Snow drifts, old snow

Avalanche prone locations

Danger description

The sometimes strong wind will transport the fresh snow and, in some cases, old snow as well. Single winter sport participants can release avalanches. Mostly they are rather small. In isolated cases avalanches can also penetrate deep layers and reach medium size. Backcountry touring and snowshoe hiking call for experience in the assessment of avalanche danger.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
