

**As a consequence of fresh snow and wind a considerable avalanche danger will be encountered over a wide area**

Edition: 8.12.2017, 17:00 / Next update: 9.12.2017, 17:00

**Avalanche danger**

**region D**

**Level 2, moderate**

**Snow drifts**

**Avalanche prone locations**

**Danger description**

The storm force wind will transport the fresh snow significantly. Fresh snow drift accumulations are to be found in gullies and bowls, and behind abrupt changes in the terrain. In many cases avalanches are only small but can be released in some cases even by a single winter sport participant. The fresh snow drift accumulations are to be avoided whenever possible.

**Danger levels**

1 low

2 moderate

3 consider.

4 high

5 very high
