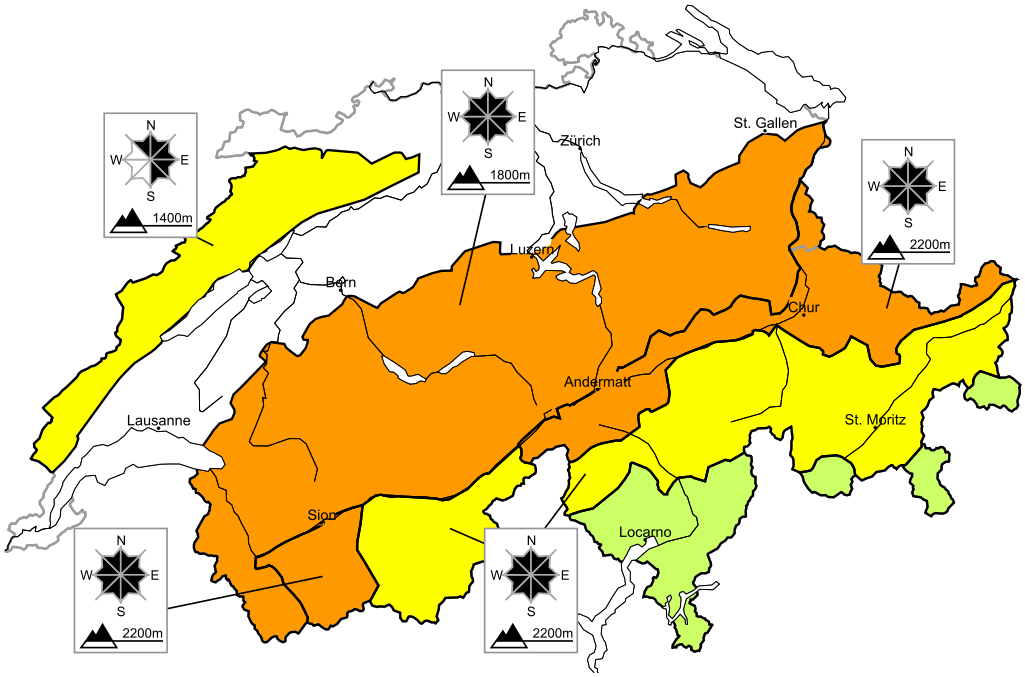
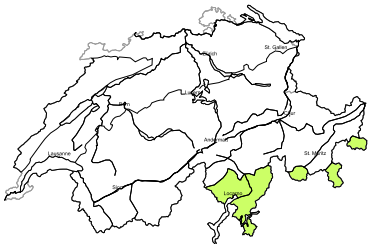
As a consequence of fresh snow and wind a considerable avalanche danger will be encountered over a wide area

Edition: 8.12.2017, 17:00 / Next update: 9.12.2017, 17:00

Avalanche danger



region E | **Level 1, low**



Snow drifts

A little snow is lying. As a consequence of the stormy weather small snow drift accumulations will form, especially at elevated altitudes. Individual avalanche prone locations are to be found in particular in extremely steep terrain. Restraint should be exercised because avalanches can sweep people along and give rise to falls.

Danger levels 1 low 2 moderate 3 consider. 4 high 5 very high
