

Increase in avalanche danger as the day progresses

Edition: 9.12.2017, 17:00 / Next update: 10.12.2017, 08:00

Avalanche danger

region D **Level 3, considerable**

Snow drifts, old snow

Avalanche prone locations

Danger description

The sometimes strong wind will transport the fresh snow and, in some cases, old snow as well. Single winter sport participants can release avalanches. Mostly they are rather small. The number and size of avalanche prone locations will increase as the day progresses. In isolated cases avalanches can also penetrate deep layers and reach medium size. Backcountry touring and other off-piste activities call for experience in the assessment of avalanche danger.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
