

In the west a high avalanche danger will be encountered in some regions

Edition: 10.12.2017, 17:00 / Next update: 11.12.2017, 17:00

Avalanche danger

region E

Level 3, considerable

Snow drifts, old snow

Avalanche prone locations

Danger description

The storm force wind will transport the fresh snow and, in some cases, old snow as well. The fresh snow drift accumulations are prone to triggering. Single winter sport participants can release avalanches. They can penetrate deep layers and reach medium size. Backcountry touring and other off-piste activities call for experience in the assessment of avalanche danger.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
