

Considerable avalanche danger will be encountered over a wide area

Edition: 17.12.2017, 17:00 / Next update: 18.12.2017, 08:00

Avalanche danger

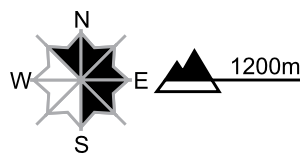

region F **Level 2, moderate**

Snow drifts

Avalanche prone locations

Danger description

As a consequence of the sometimes strong wind mostly small snow drift accumulations will form, especially adjacent to the ridge line and in pass areas. These are to be evaluated with care and prudence in very steep terrain. Backcountry touring calls for careful route selection.
