

Considerable avalanche danger will be encountered over a wide area

Edition: 17.12.2017, 17:00 / Next update: 18.12.2017, 08:00

Avalanche danger

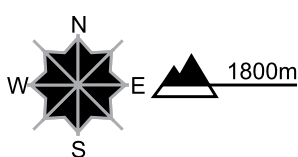

region E

Level 2, moderate

Old snow, snow drifts

Avalanche prone locations

Danger description

The mostly small snow drift accumulations of Sunday are in some cases still prone to triggering. Additionally in isolated cases avalanches can be released in the old snowpack. These avalanche prone locations are to be found in particular on very steep shady slopes. Mostly the avalanches are small. Backcountry touring calls for careful route selection.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
