

Considerable avalanche danger will be encountered over a wide area

Edition: 18.12.2017, 08:00 / Next update: 18.12.2017, 17:00

Avalanche danger

region C

Level 3, considerable

Old snow, snow drifts

Avalanche prone locations

Danger description

Even single winter sport participants can release avalanches. These can be triggered in the old snowpack and reach dangerously large size. Whumpung sounds and the formation of shooting cracks when stepping on the snowpack can indicate the danger. As a consequence of the northerly wind easily released snow drift accumulations will form. These are to be avoided as far as possible. Experience in the assessment of avalanche danger is required.
