

High avalanche danger will be encountered in some regions

Edition: 28.12.2017, 08:00 / Next update: 28.12.2017, 17:00

Avalanche danger

region B

Level 3, considerable

Fresh snow and snow drifts, old snow

Avalanche prone locations

Danger description

The fresh snow and snow drift accumulations are poorly bonded with the old snowpack. Single persons can release avalanches. Natural avalanches are possible. Avalanches can release the weakly bonded old snow as well and reach a dangerous size. Backcountry touring and other off-piste activities call for caution and restraint.
