

High avalanche danger will be encountered in some regions

Edition: 28.12.2017, 08:00 / Next update: 28.12.2017, 17:00

Avalanche danger

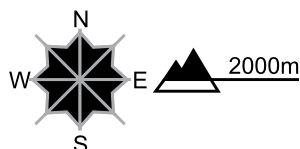

region C **Level 3, considerable**

Fresh snow and snow drifts

Avalanche prone locations

Danger description

The fresh snow and snow drift accumulations are poorly bonded with the old snowpack. Single persons can release avalanches. Natural avalanches are possible. Avalanches can reach medium size. Backcountry touring and other off-piste activities call for caution and restraint.

Full-depth avalanches

On steep grassy slopes individual full-depth avalanches are possible.
