

## Considerable avalanche danger will prevail

Edition: 28.12.2017, 17:00 / Next update: 29.12.2017, 08:00

### Avalanche danger

**region A** **Level 3, considerable**

### Fresh snow and snow drifts, old snow

#### Avalanche prone locations

#### Danger description

The fresh snow and snow drift accumulations are poorly bonded with the old snowpack. Single persons can release avalanches. Only isolated natural avalanches are possible. In some places avalanches can release the weakly bonded old snow as well and reach a dangerous size. Backcountry touring and other off-piste activities call for experience in the assessment of avalanche danger.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
