

In the west and in the north a high avalanche danger will be encountered in some regions

Edition: 29.12.2017, 17:00 / Next update: 30.12.2017, 08:00

Avalanche danger

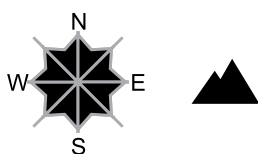

region D

Level 3, considerable

Wet and full-depth avalanches

Avalanche prone locations

Danger description

The snowpack will become wet all the way through as the day progresses. As a consequence of the rain a large number of small and medium-sized full-depth and wet avalanches are to be expected. The conditions are unfavourable for snow sport activities outside marked and open pistes. Exposed parts of transportation routes can be endangered.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
