

Considerable avalanche danger will be encountered over a wide area

Edition: 1.1.2018, 17:00 / Next update: 2.1.2018, 08:00

Avalanche danger

region A

Level 3, considerable

Fresh snow and snow drifts

Avalanche prone locations

Danger description

As a consequence of fresh snow and strong wind easily released snow drift accumulations will form. These represent the main danger. Avalanches can be released, even by a single winter sport participant and reach medium size. Individual natural avalanches are possible.

Backcountry touring and other off-piste activities call for experience in the assessment of avalanche danger.

Full-depth avalanches

Individual full-depth avalanches are possible below approximately 2200 m.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
