

Considerable avalanche danger will be encountered over a wide area

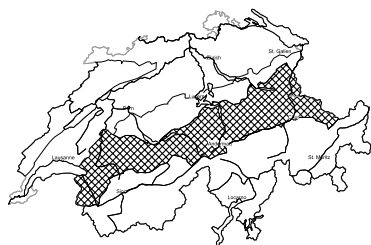

Edition: 1.1.2018, 17:00 / Next update: 2.1.2018, 08:00

Avalanche danger

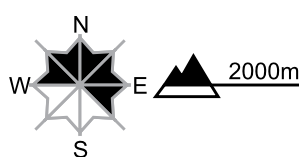

region B

Level 3, considerable

Snow drifts

Avalanche prone locations

Danger description

As a consequence of the strong wind easily released snow drift accumulations will form. Mostly avalanches are small but can be released even by a single winter sport participant. Backcountry touring and other off-piste activities call for experience in the assessment of avalanche danger.

Full-depth avalanches

Individual full-depth avalanches are possible below approximately 2200 m.
