

Considerable avalanche danger will be encountered over a wide area

Edition: 1.1.2018, 17:00 / Next update: 2.1.2018, 08:00

Avalanche danger

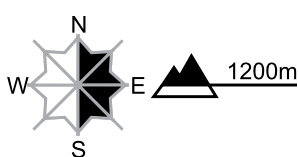

region D

Level 3, considerable

Snow drifts

Avalanche prone locations

Danger description

As a consequence of fresh snow and stormy weather easily released snow drift accumulations will form, especially in gullies and bowls, and behind abrupt changes in the terrain. These are to be bypassed in steep terrain. Backcountry touring and snowshoe hiking call for careful route selection.
