

A very critical avalanche situation will be encountered over a wide area

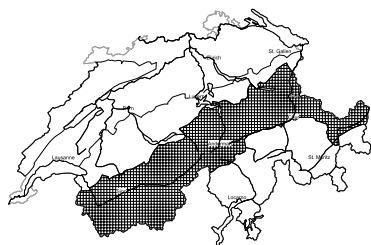

Edition: 4.1.2018, 17:00 / Next update: 5.1.2018, 08:00

Avalanche danger

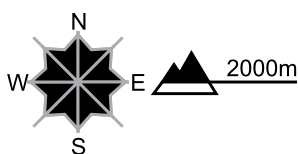

region A

Level 4, high

Fresh snow and snow drifts, old snow

Avalanche prone locations

Danger description

More natural avalanches are to be expected, in particular during the night. Avalanches, capable of reaching the valleys, must be expected. The danger of natural avalanches will decrease during the day. Exposed buildings and transportation routes are endangered over a wide area. Temporary safety measures are to remain in place. The conditions are very dangerous for snow sport activities outside marked and open pistes.

Wet and full-depth avalanches

As a consequence of the rain numerous full-depth and wet avalanches are to be expected below approximately 2000 m, in particular during the night. Slides can occur on cut slopes. Exposed parts of transportation routes can be endangered.
