

A critical avalanche situation will be encountered over a wide area

Edition: 5.1.2018, 08:00 / Next update: 5.1.2018, 17:00

Avalanche danger

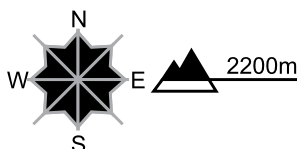

region A **Level 4, high**

Fresh snow and snow drifts, old snow

Avalanche prone locations

Danger description

Individual natural avalanches are to be expected. In the typical avalanche paths these can reach the valleys. Exposed parts of transportation routes can be endangered. The danger of natural avalanches will decrease during the day. Temporary safety measures can be gradually eased. The conditions are dangerous for snow sport activities outside marked and open pistes.

Wet and full-depth avalanches

Below approximately 2200 m more full-depth and wet avalanches are to be expected. Slides can occur on cut slopes.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
