

In southern Upper Valais a high avalanche danger will be encountered over a wide area

Edition: 7.1.2018, 17:00 / Next update: 8.1.2018, 08:00

Avalanche danger

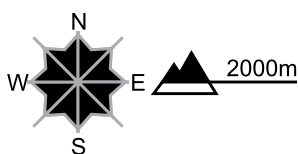

region E

Level 2, moderate

Snow drifts, old snow

Avalanche prone locations

Danger description

Fresh snow drift accumulations are small but in some cases prone to triggering. Additionally in very isolated cases avalanches can also be released in the old snowpack, especially on north facing slopes. Careful route selection is recommended.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
