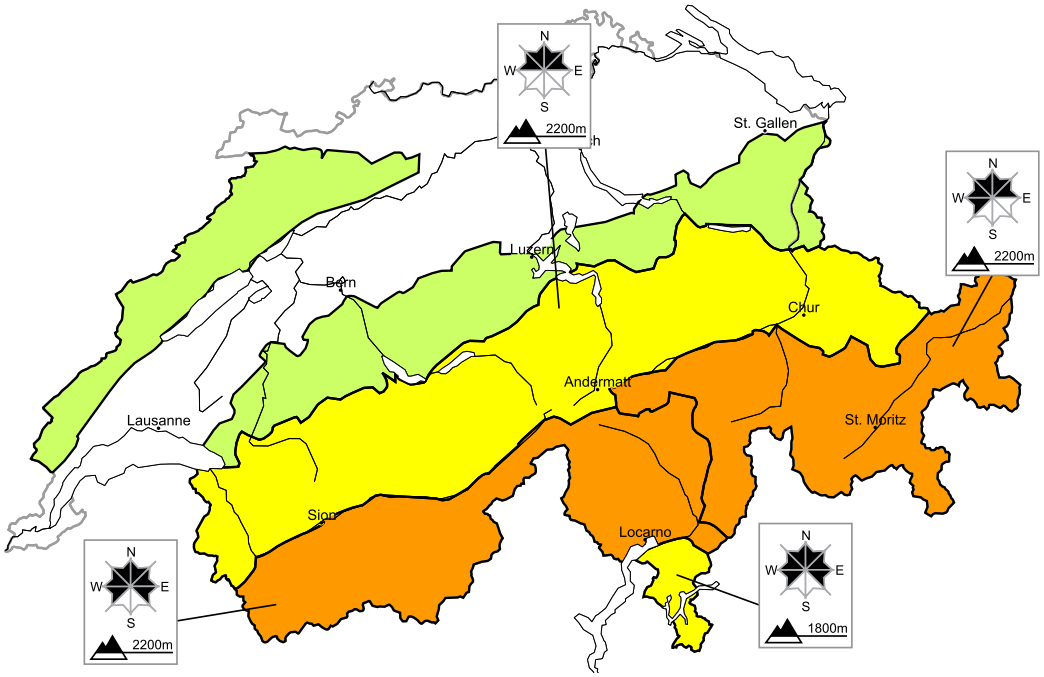
Considerable avalanche danger will be encountered over a wide area

Edition: 12.1.2018, 08:00 / Next update: 12.1.2018, 17:00

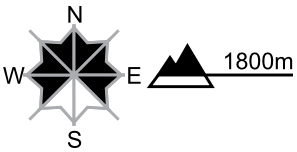
Avalanche danger



region D | **Level 2, moderate**

Snow drifts

Avalanche prone locations



Danger description

The somewhat older snow drift accumulations can still be released in some cases. Avalanche prone locations are to be found in particular on steep shady slopes. Careful route selection is recommended.

Full-depth avalanches

More full-depth avalanches are possible. This applies in all aspects below approximately 2000 m. Caution is to be exercised in areas with glide cracks.

Danger levels 1 low | 2 moderate | 3 consider. | 4 high | 5 very high
