

Considerable avalanche danger will be encountered over a wide area

Edition: 12.1.2018, 08:00 / Next update: 12.1.2018, 17:00

Avalanche danger

region E

Level 1, low

Dry avalanches

A favourable avalanche situation will prevail. Individual avalanche prone locations are to be found in particular in extremely steep terrain. Restraint should be exercised because avalanches can sweep people along and give rise to falls.

Full-depth avalanches

More full-depth avalanches are possible. This applies in all aspects below approximately 2400 m. Caution is to be exercised in areas with glide cracks.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
