

Stormy weather and fresh snow: In the west and in the north a high avalanche danger will be encountered over a wide area

Edition: 17.1.2018, 17:00 / Next update: 18.1.2018, 08:00

Avalanche danger

region F

Level 3, considerable

Snow drifts

Avalanche prone locations

Danger description

As a consequence of fresh snow and stormy weather snow drift accumulations have formed. These are mostly only small but can be released easily. The snow drift accumulations are to be avoided in steep terrain.

Wet and full-depth avalanches

Moist snow slides and avalanches are to be expected as a consequence of the rain. Individual full-depth avalanches can also occur. Caution is to be exercised in areas with glide cracks.
