Avalanche danger

region C

Level 3, considerable

Fresh snow and snow drifts

Avalanche prone locations

Danger description

The fresh snow and snow drift accumulations of the last few days are prone to triggering. As a consequence of fresh snow and stormy weather further snow drift accumulations will form. Avalanches can be released, even by a single winter sport participant and reach medium size. Individual natural avalanches are possible. Snow sport activities outside marked and open pistes call for extensive experience in the assessment of avalanche danger and great restraint.

Full-depth avalanches

In all aspects individual full-depth avalanches are possible. Caution is to be exercised in areas with glide cracks. Slides can occur on cut slopes.
