

As a consequence of fresh snow and stormy weather a high avalanche danger will be encountered over a wide area

Edition: 20.1.2018, 17:00 / Next update: 21.1.2018, 08:00

Avalanche danger

region F

Level 3, considerable

Snow drifts

Avalanche prone locations

Danger description

As a consequence of fresh snow and stormy weather snow drift accumulations will form. These are mostly small but can in some cases be released easily. They are to be avoided in steep terrain.

Wet avalanches

As a consequence of the rain small moist snow slides are to be expected below approximately 1200 m. This applies in particular during the night.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
