

As a consequence of fresh snow and stormy weather a high avalanche danger will be encountered over a wide area

Edition: 21.1.2018, 08:00 / Next update: 21.1.2018, 17:00

Avalanche danger

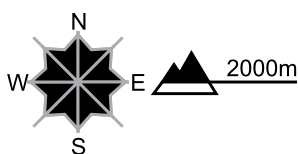

region E

Level 3, considerable

Snow drifts

Avalanche prone locations

Danger description

As a consequence of fresh snow and stormy weather snow drift accumulations have formed. These can be released easily, even by a single winter sport participant. The number and size of avalanche prone locations will increase with altitude. The snow drift accumulations are to be avoided in steep terrain. Backcountry touring and snowshoe hiking call for experience in the assessment of avalanche danger.
