

Very high avalanche danger will be encountered over a wide area

Edition: 22.1.2018, 17:00 / Next update: 23.1.2018, 08:00

Avalanche danger

region F

Level 1, low

Wet and full-depth avalanches

The snowpack is wet all the way through. In particular on extremely steep slopes individual full-depth avalanches and wet snow slides are possible. Apart from the danger of being buried, restraint should be exercised in view of the danger of avalanches sweeping people along and giving rise to falls.
