### Avalanche danger

#### region C

#### Level 1, low

#### Full-depth avalanches

On steep grassy slopes full-depth avalanches are possible. They can be released at any time of day or night. Areas with glide cracks are to be avoided as far as possible.

#### Old snow

Individual avalanche prone locations for dry avalanches are to be found in particular in extremely steep terrain. Even a small avalanche can sweep snow sport participants along and give rise to falls.
