

Fresh snow drifts require caution. Slight increase in avalanche danger as the day progresses

Edition: 1.2.2018, 08:00 / Next update: 1.2.2018, 17:00

Avalanche danger

region D

Level 1, low

Full-depth avalanches

On steep grassy slopes full-depth avalanches are possible. They can be released at any time of day or night. Areas with glide cracks are to be avoided as far as possible.

Old snow

Individual avalanche prone locations for dry avalanches are to be found in particular in extremely steep terrain. Even a small avalanche can sweep snow sport participants along and give rise to falls.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
