

# Fresh snow drifts require caution. Slight increase in avalanche danger as the day progresses

Edition: 1.2.2018, 08:00 / Next update: 1.2.2018, 17:00

## Avalanche danger

region D

Level 1, low

### Full-depth avalanches

On steep grassy slopes full-depth avalanches are possible. They can be released at any time of day or night. Areas with glide cracks are to be avoided as far as possible.

### Old snow

Individual avalanche prone locations for dry avalanches are to be found in particular in extremely steep terrain. Even a small avalanche can sweep snow sport participants along and give rise to falls.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
