

Considerable avalanche danger will be encountered in some regions. Fresh snow drifts require caution

Edition: 2.2.2018, 08:00 / Next update: 2.2.2018, 17:00

Avalanche danger

region E

Level 1, low

Full-depth avalanches

On steep grassy slopes full-depth avalanches are possible. They can be released at any time of day or night. Areas with glide cracks are to be avoided as far as possible.

Old snow

Individual avalanche prone locations for dry avalanches are to be found in particular in extremely steep terrain. Even a small avalanche can sweep snow sport participants along and give rise to falls.
