

## Snow drifts require caution

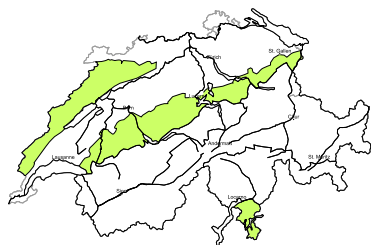

Edition: 2.2.2018, 17:00 / Next update: 3.2.2018, 08:00

### Avalanche danger

#### region D

#### Level 1, low

#### Snow drifts

Individual avalanche prone locations for dry avalanches are to be found in particular in extremely steep terrain. Even a small avalanche can sweep snow sport participants along and give rise to falls.

#### Full-depth avalanches

On steep grassy slopes individual full-depth avalanches are possible. They can be released at any time of day or night. Areas with glide cracks are to be avoided as far as possible.

#### Danger levels
