

Moderate avalanche danger will be encountered over a wide area. Fresh snow drifts require caution

Edition: 6.2.2018, 08:00 / Next update: 6.2.2018, 17:00

Avalanche danger

region D

Level 1, low

Snow drifts

In some localities small snow drift accumulations have formed, especially at elevated altitudes. They are to be evaluated with care and prudence in particular in terrain where there is a danger of falling.

Full-depth avalanches

On steep grassy slopes individual full-depth avalanches are possible. They can be released at any time of day or night. Areas with glide cracks are to be avoided as far as possible.

Danger levels

 1 low

 2 moderate

 3 consider.

 4 high

 5 very high
