

A generally favourable avalanche situation will prevail

Edition: 7.2.2018, 17:00 / Next update: 8.2.2018, 08:00

Avalanche danger

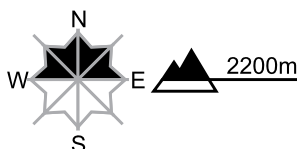

region B **Level 2, moderate**

Fresh snow and snow drifts

Avalanche prone locations

Danger description

The fresh snow and snow drift accumulations of the last few days are to be evaluated with care and prudence especially on steep shady slopes at elevated altitudes. Apart from the danger of being buried, restraint should be exercised also in view of the danger of avalanches sweeping people along and giving rise to falls. Careful route selection is recommended.
