

Considerable avalanche danger will be encountered in some regions. Snow drifts require caution

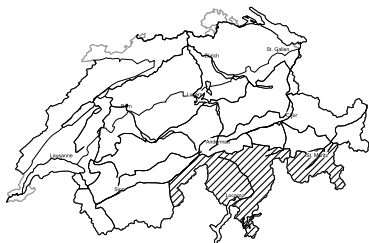

Edition: 12.2.2018, 08:00 / Next update: 12.2.2018, 17:00

Avalanche danger

region B

Level 2, moderate

Snow drifts

Avalanche prone locations

Danger description

As a consequence of the strong wind snow drift accumulations will form. These are mostly small but can in some cases be released easily. They are to be found in particular adjacent to the ridge line and in gullies and bowls. Careful route selection is recommended.
