

Considerable avalanche danger will be encountered in some regions. Snow drifts require caution

Edition: 12.2.2018, 08:00 / Next update: 12.2.2018, 17:00

Avalanche danger

region F

Level 1, low

Snow drifts

Fresh snow drift accumulations are small but can in some cases be released easily. The number and size of avalanche prone locations will increase with altitude. Caution is to be exercised in particular in extremely steep terrain. Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.
