

Outside marked and open pistes a considerable avalanche danger will be encountered over a wide area

Edition: 16.2.2018, 08:00 / Next update: 16.2.2018, 17:00

Avalanche danger

region F

Level 2, moderate

Snow drifts

Avalanche prone locations

Danger description

Fresh and somewhat older snow drift accumulations are small but in some cases prone to triggering. They are to be evaluated with care and prudence.

Wet and full-depth avalanches

As a consequence of the rain mostly small full-depth and wet avalanches are to be expected. This applies in all aspects. Exposed parts of transportation routes can be endangered.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
