## Avalanche danger

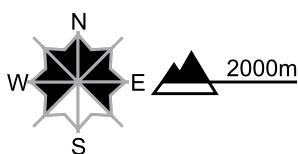

**region D**

**Level 2, moderate**

### Snow drifts

#### Avalanche prone locations

#### Danger description

Fresh and somewhat older snow drift accumulations are mostly small but in some cases prone to triggering. They are to be found especially adjacent to the ridge line. The avalanche prone locations are sometimes covered with fresh snow and difficult to recognise. Careful route selection is recommended.

### Full-depth avalanches

In all aspects full-depth avalanches are possible. Caution is to be exercised in areas with glide cracks.
