

Considerable avalanche danger will be encountered in some regions

Edition: 1.3.2018, 08:00 / Next update: 1.3.2018, 17:00

Avalanche danger

region A

Level 3, considerable

Fresh snow and snow drifts

Avalanche prone locations

Danger description

The fresh snow and snow drift accumulations are prone to triggering. Single snow sport participants can release avalanches. Mostly these are small. Especially in the regions exposed to the foehn wind medium-sized avalanches are possible. Whumpfung sounds and the formation of shooting cracks when stepping on the snowpack serve as an alarm indicating the danger. Backcountry touring and other off-piste activities call for experience in the assessment of avalanche danger.
