

In the west a considerable avalanche danger will be encountered over a wide area. Snow drifts require caution

Edition: 2.3.2018, 17:00 / Next update: 3.3.2018, 08:00

Avalanche danger

region A

Level 3, considerable

Fresh snow and snow drifts

Avalanche prone locations

Danger description

The fresh snow and snow drift accumulations of the last few days are prone to triggering. Single snow sport participants can release avalanches, including medium-sized ones. The avalanche prone locations are covered with fresh snow and difficult to recognise. Individual natural avalanches are possible, in particular along the border with France. Backcountry touring and other off-piste activities call for experience in the assessment of avalanche danger and careful route selection.
