

# Slight increase in avalanche danger as a consequence of the snowfall

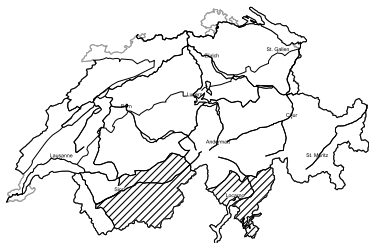

Edition: 6.3.2018, 17:00 / Next update: 7.3.2018, 08:00

## Avalanche danger

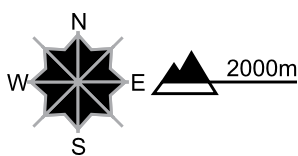

region C

Level 2, moderate

### Fresh snow and snow drifts, old snow

#### Avalanche prone locations

#### Danger description

As a consequence of fresh snow and wind further snow drift accumulations will form. Fresh and older snow drift accumulations are mostly small but prone to triggering. Single winter sport participants can release avalanches. Backcountry touring and other off-piste activities call for careful route selection.

Danger levels

1 low

2 moderate

3 consider.

4 high

5 very high
