

# Slight increase in avalanche danger as a consequence of the snowfall

Edition: 7.3.2018, 08:00 / Next update: 7.3.2018, 17:00

## Avalanche danger

**region E**

**Level 2, moderate**

### Snow drifts

#### Avalanche prone locations

#### Danger description

As a consequence of fresh snow and wind sometimes avalanche prone snow drift accumulations will form. These are to be evaluated with care and prudence in particular in very steep terrain. Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.
